

This is going to be the app that I want to make so that is why I have it and it have 5 different states.

Starting Page: It is a simple page that is going to have the 4 other stats on it that it will connect to

Check Order: It is going to check if you have any orders to do.

Order Histroy: It is going to show what orders that you have sent out so that you can figure out gold mines for selling the items;

In Voice: It is going to be were you send invoices.

To Sales For Month: It is going to tell you how much that you have made this month and it will compare it against last month to see if you are ahead or behind.
