

Use Case Name

Add Customer

Customer Information

This is going to be where you are going to add the customer information that is going to hold information

Actors

- Customer Information - The only person that is going to interact with the app is going to be the person that is selling stuff

Main Flow

- Consult launches application
- You are going to add a Customer into the app (includes)

Priority 1

- This is the most important use case since there is going to be more that are going to go off of it.

Status

- Making the app function functionality, so that it might never get developed

Pre-Conditions

- Consult must of loaded the application

Post-Conditions

Consult must of added a person into the application
